

## City of Pascagoula ARPA Project Information Sheet

Project Name: Miscellaneous Water Main Replacement

Project Description: The project consists of the replacement of water mains throughout the Pascagoula water distribution system. Waterlines to be replaced include the mains serving Market Street, Communny Avenue, Frederic Street, Ingalls Avenue, Canty Street, Dupont Avenue, and Chicot Road.

Project Justification: The existing water mains outlined included in the project to be replaced are either undersized, deteriorated, or both. Many of the existing mains are transite waterlines. Replacement of these waterlines, which serve as a large part of the foundation of the Pascagoula water distribution system, would improve the overall effectiveness and efficiency of the system. The project will also provide more effective fire flows, as well as reduce the increasing maintenance costs related to the deteriorating system.

Project Cost: The estimated construction cost for the proposed improvements in this project is **\$1,800,000.00**. The proposed cost sharing structure is as follows:

- City of Pascagoula Share: \$450,000.00
- Jackson County Share: \$450,000.00
- MCWI Grant Program Share: \$900,000.00
